

# KRANDELLE JOSH B. KALAW

Dasmariñas City, Cavite, Philippines • +63 976 310 2760 • [krandellek@gmail.com](mailto:krandellek@gmail.com)  
LinkedIn: [linkedin.com/in/krandelle-kalaw-8a91652a1/](https://www.linkedin.com/in/krandelle-kalaw-8a91652a1/) | GitHub: [github.com/Krandelle](https://github.com/Krandelle)

## PROFESSIONAL SUMMARY

Results-driven Information Technology graduate (completed all academic and practicum requirements; graduating September 2026) and aspiring Full Stack Developer with a strong foundation in Object-Oriented Programming, Data Structures, and Modern Web Architecture. Proven experience across the full software development lifecycle, having engineered complex applications ranging from a React/Electron hardware controller to a full-stack PHP/MySQL booking system. Backed by enterprise IT infrastructure internship experience at Lufthansa Technik Philippines. Highly adaptable, available for immediate full-time employment, and eager to leverage advanced engineering practices—including AI-assisted coding workflows—to build scalable software solutions at Multisys Corporation.

## TECHNICAL SKILLS

- **Core Languages:** JavaScript (ES6+), HTML5, CSS3, JSX, PHP, Python, SQL
- **Frontend & Desktop:** React 19, Electron 39, Node.js, Responsive UI Design
- **Backend & Databases:** MySQL, Relational Database Design, CRUD Operations, Server-Side Session Management, Secure IPC (contextBridge)
- **Hardware & IoT:** USB Serial Communication (serialport), GRBL Controllers, ESP32, G-code Generation
- **Tools & Build Systems:** Git, npm, electron-builder, XAMPP, cross-env, concurrently
- **Development Practices:** AI-Assisted Development & Prompt Engineering, OOP, Data Structures & Algorithms

## TECHNICAL PROJECTS

**LaserPix** | *Desktop Laser Controller & Image Processing System* [github.com/Krandelle/LaserPix](https://github.com/Krandelle/LaserPix)

- Engineered a robust full-stack desktop application using React 19 (Frontend) and Node.js/Electron 39 (Backend), featuring a modern UI for real-time hardware control and pixel-perfect image processing.
- Developed a highly reliable backend communication layer using Node.js serialport, enabling auto-detection, dynamic baud rate management, and seamless G-code streaming to ESP32-based GRBL controllers.
- Secured the application architecture using contextBridge and preload.js to safely expose native Node.js backend APIs to the React frontend without compromising system security boundaries.

**Happy-Cars** | *Full-Stack Car Rental & Booking System* [github.com/Krandelle/Happy-Cars](https://github.com/Krandelle/Happy-Cars)

- Developed a dynamic, full-stack web application using PHP and MySQL to manage vehicle inventory, user bookings, and administrative operations.
- Designed and implemented a relational database schema to handle complex data relationships between users, vehicles, and reservation records.
- Built a secure admin dashboard for real-time fleet management, booking approvals, and user activity monitoring.
- Implemented core CRUD operations and server-side session management for secure user authentication and role-based access control.

## WORK EXPERIENCE

**Lufthansa Technik Philippines** | *IT Intern* March 2026 – June 2026

- Supported enterprise IT operations, hardware troubleshooting, and critical systems maintenance across corporate and hangar departments, ensuring optimal system operational performance.

- Assisted in complex network configurations and system administration tasks within a large-scale aviation IT infrastructure, gaining deep exposure to enterprise-level system integration.
- Resolved technical helpdesk tickets efficiently, utilizing analytical problem-solving skills to maximize system uptime and productivity for cross-functional corporate teams.

#### **Freelance Remote Contracts** | *Video Editor & Multimedia Specialist*

**2023 – 2025**

- Managed comprehensive end-to-end digital workflows, editing, mixing, and refining high-quality video/audio content while strictly meeting aggressive project deadlines.
- Communicated effectively with global clients via email and chat to gather granular technical requirements, translate creative feedback into actionable items, and ensure seamless delivery.

#### **Remote Operations** | *Virtual Assistant Intern (SHS Work Immersion)*

**2021 – 2022**

- Completed a highly structured corporate work immersion program, handling calendar scheduling, high-volume data entry, and core administrative workflows using Google Workspace.
- Maintained absolute confidentiality and strict data accuracy across all assigned administrative tasks while effectively supporting daily team operations.

## **EDUCATION**

---

#### **Cavite State University - Imus Campus** | *Bachelor of Science in Information Technology*

**Graduating Sept 2026**

**Status:** Completed all academic coursework and enterprise practicum requirements. Awaiting formal graduation. (*Available for immediate full-time employment*)

**Relevant Coursework:** Object-Oriented Programming, Data Structures & Algorithms, Web Systems & Technologies, Advanced Database Management (MySQL), Systems Integration & Architecture, App Development & Emerging Technologies.

#### **St. Vincent De Ferrer College of Camarin** | *Senior High School (STEM Strand)*

**2020 – 2022**
