PROFESSIONAL SUMMARY

Results-driven Information Technology graduate and aspiring Software Developer with a strong foundation in Object-Oriented Programming, Data Structures, and Modern Web Architectures. Proven experience across the full software development lifecycle, having solely engineered a complex full-stack desktop application using React and Electron, backed by a Node.js asynchronous communication layer. Equipped with practical IT administration and enterprise compliance experience from Lufthansa Technik Philippines, bridging the gap between robust software development, information security awareness, and reliable hardware operations. Fast learner eager to leverage AI-assisted engineering and scalable cloud solutions to build reliable end-to-end applications.

WORK EXPERIENCE

IT Intern

Lufthansa Technik Philippines | Mar 2026 – Jun 2026

- Supported the Information Security Officer with IT administrative workflows, including cross-departmental coordination for equipment logistics.
- Designed and produced corporate cybersecurity infomercials broadcasted company-wide to educate employees on vital information security protocols.
- Participated in internal audits and ISO certification assessments, directly demonstrating IT systems and operational workflows to external auditors to validate compliance.

Freelance Multimedia & Technical Specialist

Upwork Remote Contracts | 2023 – 2025

- Organized structured cloud-based storage architectures and optimized multi-threaded rendering pipelines for cross-platform asset delivery.
- Managed end-to-end digital media workflows, coordinating high-volume audio/video processing and cloud asset distribution under aggressive client deadlines.
- Interfaced with international clients via asynchronous communication channels to translate technical specifications into finalized deliverables.

Virtual Assistant Intern

Hometime (SHS Work Immersion) | 2021 – 2022

- Handled structured data entry, digital documentation, and core administrative workflows utilizing Google Workspace in a remote enterprise setting.
 - Assisted in property management operations for Hometime, utilizing Xero for financial bookkeeping and coordinating Airbnb turnover and cleaning schedules.
-

EDUCATION

Bachelor of Science in Information Technology

Cavite State University - Imus Campus (Graduated: September 2026)

Cumulative GPA: 1.77

Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Advanced Database Management Systems, Web Systems & Technologies, Systems Integration & Architecture.

TECHNICAL SKILLS

- Programming Languages: JavaScript (ES6+), TypeScript, Java (Core & OOP), Python, SQL (MySQL/PostgreSQL), HTML5, CSS3, C++.
 - Backend: Node.js, Spring Boot (RESTful APIs, MVC), Relational Database Design.
 - Frontend & Desktop: React 19, Angular (Component Architecture, TypeScript), Electron 39, Responsive Web Design.
 - Development Tools & Practices: Git, GitHub, npm, electron-builder, RESTful API Integration, Secure IPC (contextBridge), AI-Assisted Development.
 - Hardware & IT Operations: USB Serial Communication (serialport), GRBL Controllers, ESP32, Network Fundamentals (TCP/IP, Routing), Enterprise Troubleshooting.
-

KEY PROJECTS & ACHIEVEMENTS

LaserPix Desktop Controller & Image Processing System (Capstone)

- Engineered a robust full-lifecycle desktop application using React 19 and Electron 39, delivering a responsive UI for real-time hardware control and dynamic image processing workflows.
- Architected an asynchronous serial communication layer in Node.js, managing dynamic baud rates, connection handshakes, and high-throughput G-code streaming to ESP32-based controllers with sub-millisecond precision.
- Enforced strict architectural security boundaries using Electron's contextBridge and preload scripts to safely expose native Node.js APIs to the React frontend, eliminating remote code execution vulnerabilities.
